35 Years of Quality and Trust in
the Automotive Sub-Industry.

ABOUT US

THE 35-YEAR-OLD ADDRESS OF QUALITY AND TRUST.

RSS Kumru Automotive was established in 1990 in Gebze/Kocaeli. In our 3,500 m² factory, we produce hydraulic hoses, steel pipes, injector tubes, and more.

We provide services with more than 3,000 product types, primarily including automobiles, trucks, tractors, and the defense industry. With our ISO 9001:2015-certified production, we maintain the highest level of quality standards.

WHY RSS KUMRU?

**RELIABLE,
CERTIFIED AND
FAST PRODUCTION.**

Wide range of products

We meet all our customers' needs, offering more than 3,000 types of products.

ISO Certified Quality

ISO Certified Quality ISO 9001:2015 and ISO 14001 standards production. In the IATF 16949 certification process. AJA Registrars-approved quality assurance.

Fast delivery

We deliver your orders on time with inventory management and flexible production capacity.

SOLUTIONS SUITABLE FOR
EVERY APPLICATION.

OUR PRODUCT RANGE

Valve Mechanism and Connection Parts

Precision-machined metal fittings, adapters, and mechanism components for valve connection points that provide flow control in hydraulic, pneumatic, and fuel circuits. Ship pipeline connection components are also included in this group.

Special Products and Shipping Lines

Non-standard pipe, hose, and connection solutions designed in accordance with customer technical drawings and specifications; special line sets resistant to saltwater and humidity conditions for the fuel, oil, and hydraulic systems of marine vessels.

Turbo Oil Pipe, Hose and Connection Parts

Special pipe, hose, and fitting sets resistant to high heat and pressure to meet the lubrication and cooling needs of turbochargers.

Injection Lines / Common Rail Injection Lines

High-pressure resistant steel injection pipes that deliver fuel to injectors in diesel engines; precision line solutions for modern common rail systems. Fuel return (leak-off) lines are also produced within this scope.

Fuel and P.T.F.E. Hoses

Fuel-resistant composite hoses for gasoline, diesel, and biofuel systems; special hoses with a PTFE inner layer for applications requiring superior resistance to chemicals, high temperatures, and corrosion.

Hydraulic System Lines and Hoses

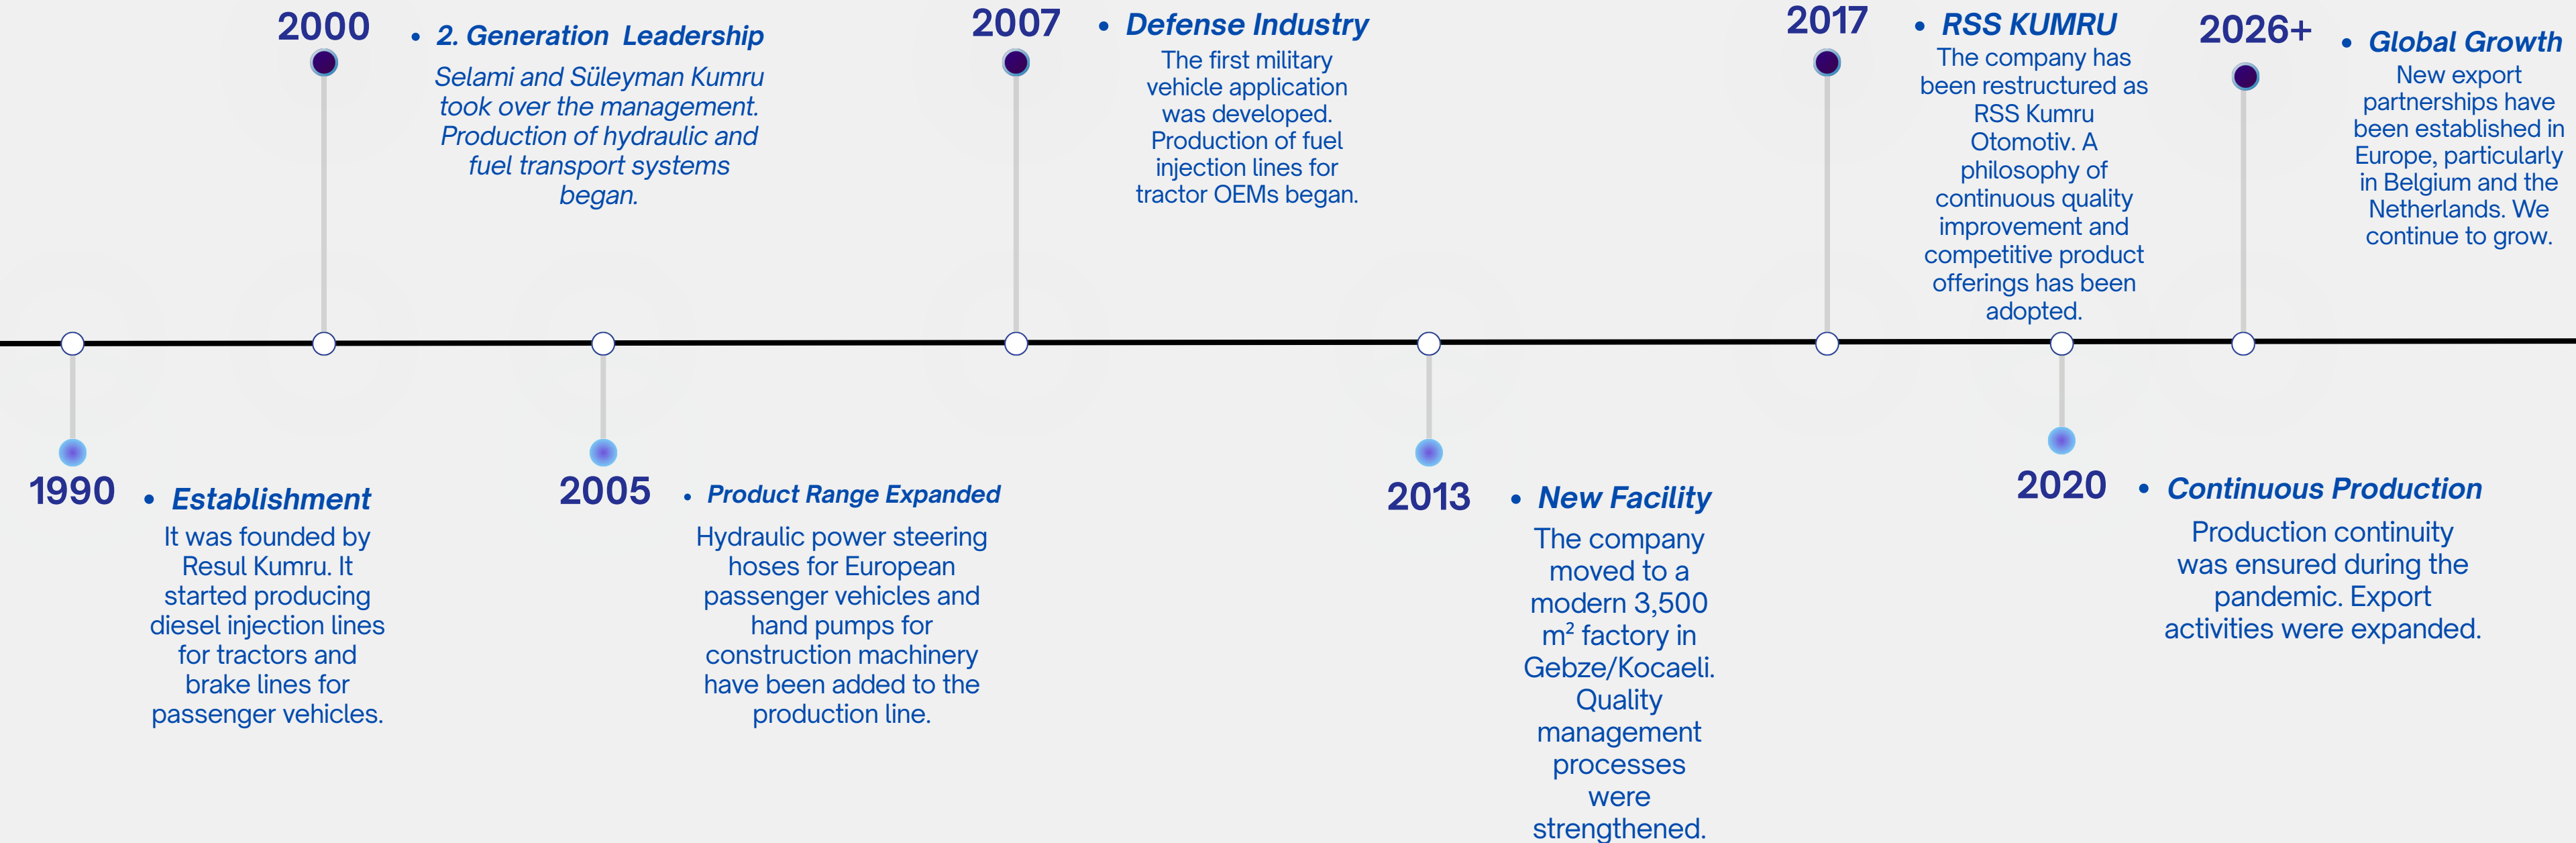

High-pressure resistant steel pipe and flexible hose systems for hydraulic power transmission in construction machinery, tractors, and heavy vehicles. (Except cabin flexible hose)

OUR HISTORY

RSS Kumru
Automotive

A STORY OF 35 YEARS OF GROWTH AND DEVELOPMENT.

OUR LABORATORY

Quality Control

Each production batch undergoes systematic quality control using calibrated measuring instruments and precision testing equipment.

R&D Support

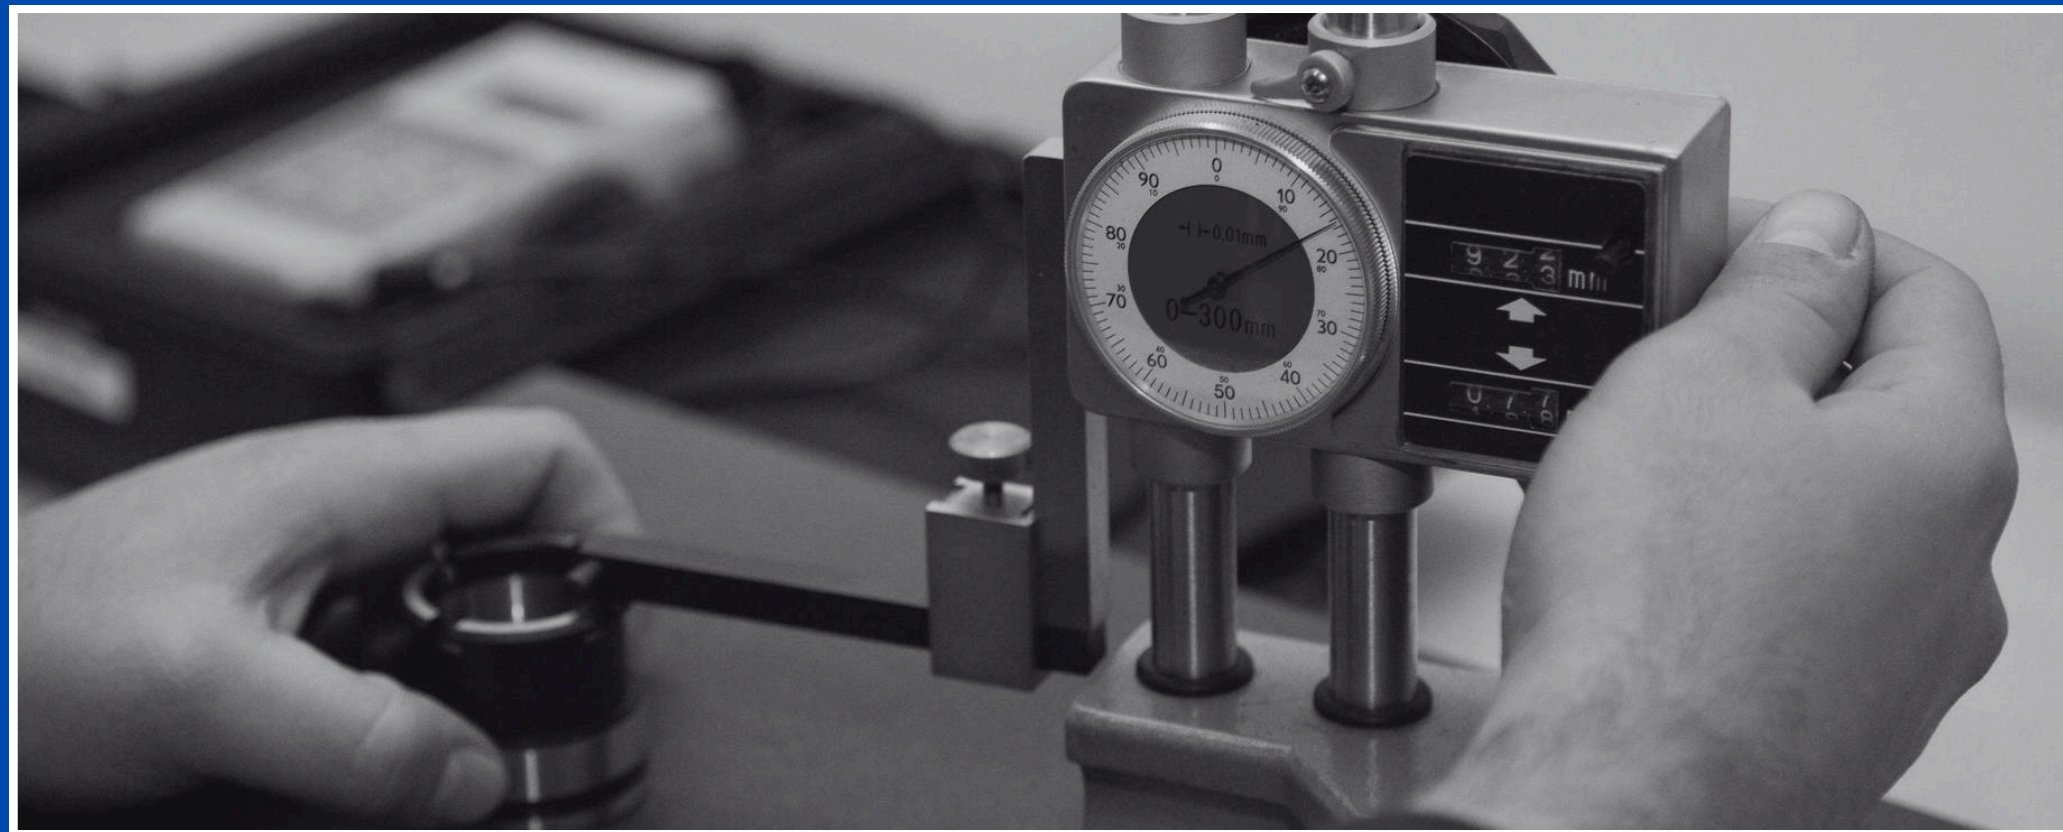

Sample production and prototype testing are carried out in the new part development processes.

PRECISE
MANUFACTURING WITH
MODERN
EQUIPMENT.

Traceability & Reporting

Measurement data for each manufactured part is recorded, and test reports are prepared according to customer requirements.

RSS Kumru
Automotive

STRONG PRESENCE IN THE GLOBAL MARKET

RSS Kumru Automotive has expanded beyond the Turkish market, exporting to the USA, Germany, Austria, Australia, Sweden, Italy, Iran, and Dubai. We produce products that meet the standards of each market.

We provide our international customers with timely delivery, consistent quality, and customized technical solutions. Through our SAHA Istanbul membership, we continue to strengthen our defense industry supply chain.

OUR MACHINERY PARK

PRECISE
MANUFACTURING
WITH MODERN
EQUIPMENT.

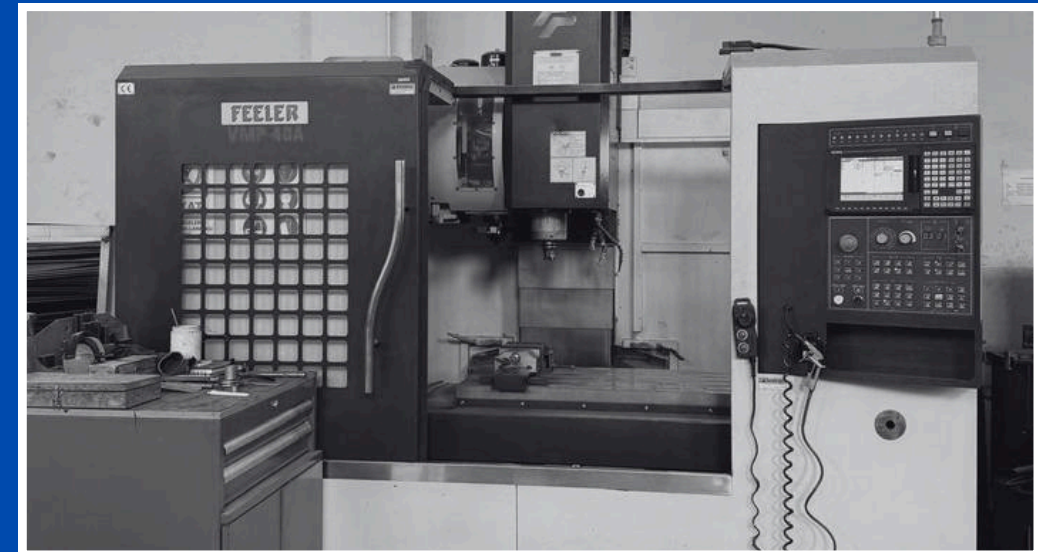

Advanced Technology

We achieve precise production with CNC pipe bending machines, automated cutting lines, and quality control systems.

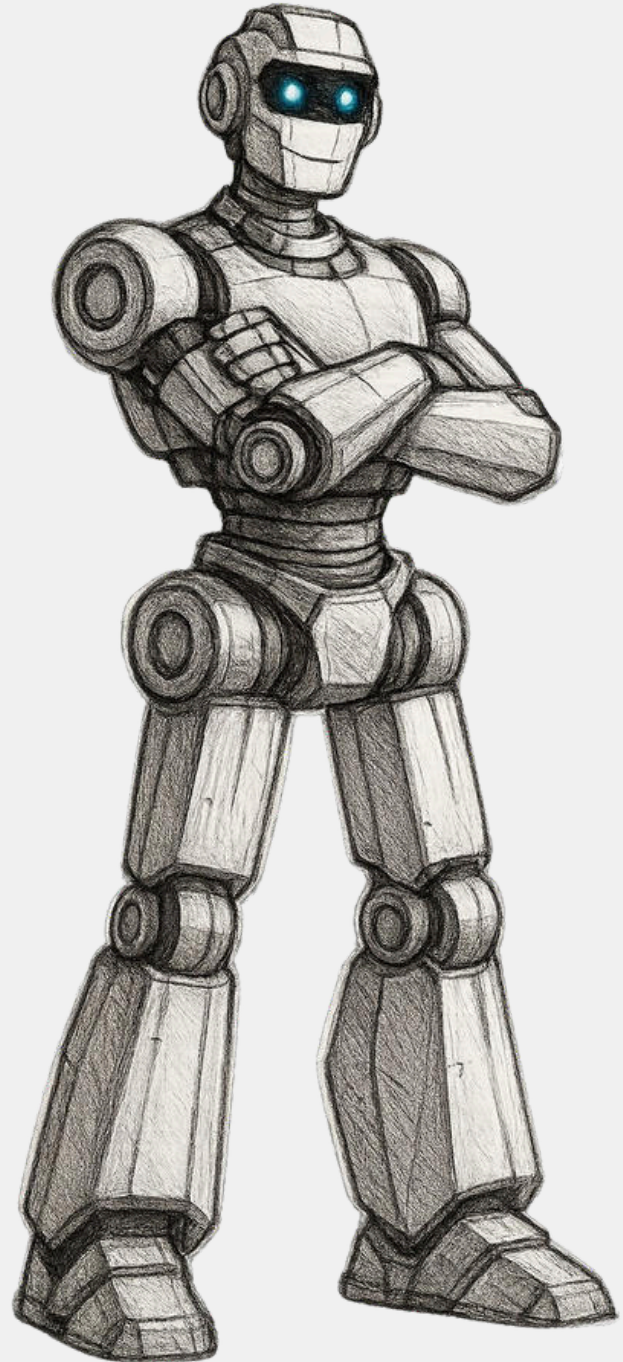

Capacity & Flexibility

With our high production capacity and flexible structure, we provide services for everything from small batches to large-volume production.
